PROFILE

Financial analyst with 6+ years of experience across equity research, FP&A and corporate finance. I build valuation models and forecasts that support investment and budgeting decisions, and present the findings clearly to senior stakeholders. Seeking a role where rigorous analysis shapes real decisions.

PROFESSIONAL EXPERIENCE

Senior Financial Analyst
2023 – Present

Company Name

- Own valuation and forecasting for a portfolio of business units, presenting monthly insights to the executive team.
- Built a driver-based rolling forecast that cut cost variance by 12% and saved the team about 30 hours of reporting a month.
- Led financial due diligence and synergy analysis for an $85M mid-market acquisition.

Financial Analyst
2020 – 2023

Company Name

- Supported budgeting, variance analysis and investment appraisals across multiple regions.
- Developed scenario and sensitivity models that helped management understand downside risk before committing capital.

Research Associate
2018 – 2020

Company Name

- Covered consumer and industrial sectors, producing earnings models and company notes.
- Initiated coverage of a mid-cap retailer with a three-statement model and DCF, identifying a 22% upside to the prevailing share price.

SELECTED PROJECTS

EQUITY RESEARCH · +22% upside

Consumer Retail Sector Initiation

Three-statement model and DCF revealing margin expansion the market had not priced in.

FP&A · -12% cost variance

Rolling Forecast Automation

Replaced a manual monthly reporting process, saving roughly 30 hours a month.

M&A · $85M deal

Acquisition Due Diligence

Financial due diligence and synergy analysis supporting a mid-market acquisition.

PORTFOLIO · Sharpe 1.4

Multi-Asset Allocation Study

Python backtests of diversified allocations, balancing return targets against drawdown limits.
