About Me

Finance focused Biomedical Engineering graduate from King's College London with equity research internship experience and private equity training. Strong quantitative and financial analysis skills supported by Bloomberg certification and CFA Level I candidacy. Seeking to contribute analytical insights and meaningful impact to a team.

Technicals

- Bloomberg Terminal (BMC Certified)
- Python
- MATLAB
- C++
- Excel
- Powerpoint

PROFESSIONAL EXPERIENCE

United Overseas Bank, Malaysia *April 2026 - Present*
FSTEP Trainee (Global Markets)

- Provide foreign exchange and interest rate hedging advices to clients based on their requirements and accessibility
- Coordinate and work closely with branches and business partners to increase sales of treasury products and utilisation of approved trade lines

UOB Kay Hian, Malaysia *May 2024 - July 2024*
Equity Research Analyst

- Analysed earnings releases, investor presentations and industry data to support sector outlook and valuation views
- Synthesised qualitative and quantitative research into concise investment summaries for senior analysts
- Evaluated company fundamentals including revenue drivers, margin trends and competitive positioning

EDUCATION

King's College London, United Kingdom
BEng with Honours in Biomedical Engineering

- Dissertation: Smart Sensing Sleeve for Continuous Monitoring of Urostomy Bag Fill-Level
  - Designed and built an end-to-end prototype integrating hardware and software, enabling real-time monitoring and data-driven decision making
- Applied statistical and machine learning techniques to analyse high-dimensional datasets and extract actionable insights
- Implemented optimisation and dimensionality reduction methods to improve model robustness and interpretability

Imperial College Business School Summer Program
Private Equity: Financing, Investing and Value Creation

- Evaluated private equity case studies, assessing business models, competitive dynamics and value creation opportunities
- Conducted commercial due diligence and investment screening on target companies
- Assessed industry positioning and growth sustainability to support investment recommendations

HELP International School, Malaysia
A-Levels

- Scholarship in Leadership Excellence for Sixth Form studies
- Physics (A*), Biology (A*), Mathematics (A), Computer Science (AS Level)
- Served as a student leader, prefect and sports captain

ACTIVITIES AND LEADERSHIP

Ultimate Frisbee, King's College London

- Captained university mixed ultimate frisbee team, developing leadership under pressure while competing in national-level tournaments
- Fostered team cohesion and performance in fast-paced competitive environments

SHINE Mentoring, King's College London

- Mentored students through tailored academic support, adapting explanations to different learning styles
- Simplified complex concepts into accessible explanations for younger students

F1 in Schools, HELP International School

- Led multidisciplinary team in international engineering competition, managing timelines and cross-functional coordination
- Applied quantitative analysis to optimise car performance using data-driven decisions
